

Belton Concrete Effect

TECHNICAL PRODUCT DATA SHEET

2020-12-22

Page 1/1

Product description:

First-class, fast-drying concrete effect spray, for a decorative concrete appearance. May be sprayed indoors and outdoors directly onto many different substrates, such as ferrous metals, wood, stone, drywall, smooth MDF-boards, cardboard, glass, ceramics and most plastics.

Technical information:

Base material: Nitro-combination
Drying time at 20 °C: Dust dry 10 min.
Dry to touch: approx. 35 min.
Dry through: approx. 24 hrs.
Flashpoint: -10 °C
Fire class: 1
Potlife: 2 years
Content: 400 ml

Preparation:

Substrates such as non-ferrous metals, galvanized steel, aluminum and certain plastics must be prepared with Belton Special Primer. Surfaces must be smooth, clean, dry and grease-free. Uneven surfaces may require some grinding.

Instructions for use/application:

Shake the can for at least 2 minutes. Test spray to check compatibility and tone. Spraying distance 15-20 cm. Depending on the desired effect apply the concrete effect lacquer in many thin layers. Turn the can upside-down after use and spray to empty the valve.
