

Belton Rose Gold Effect

Product description:

First-class, fast-drying effect lacquer for a decorative rose gold effect for use indoors and outdoors. Recommendation: to increase weather and wind resistance apply a lacquer coat of Belton Clear Lacquer for all effects (art.no. 2323399). May be used directly on many substrates, such as ferrous metals, wood, cardboard, paper, stone, glass, ceramics, clay and most plastics.

Technical information:

Base material: Acrylic resin
Drying time at 20 °C: Dust dry 15 min.
Dry to touch: approx. 45 min.
Dry through: approx. 24 hrs.
Flashpoint: -10 °C
Fire class: 1
Potlife: 2 years
Content: 400 ml

Preparation:

Substrates such as e.g. non-ferrous metals, galvanized steel, aluminum, expanded polystyrene (EPS) and certain plastics must be prepared with Belton Special Primer. Surfaces must be smooth, clean, dry and grease-free. Uneven surfaces may require some grinding.

Instructions for use/application:

Shake the can for at least 2 minutes. Test spray to check compatibility and tone. Spraying distance 15-20 cm. Depending on the desired effect apply the rose gold effect lacquer in many thin layers.

Turn the can upside-down after use and spray to empty the valve.
