

Cellulose thinner

Product description:

Hagmans Cellulosaförtunning (cellulose thinner) is a thinner which quickly evaporates and has good solubility levels. It contains a mixture of several different solvents.

Areas of use:

Hagmans Cellulosaförtunning (cellulose thinner) is for diluting Stålplast Primer CA (basic primer CA) for work on smaller areas. It is also suitable for diluting cellulose or alkyd-based paints and lacquers, as well as for cleaning tools.

Technical data:

Flashpoint: 22°C

Density: 835 kg/m³

Fire class: 2a

Basic material: Mixture of solvents

Packaging:

Article number:

23881 Bottle 6 x 1 L

23883 Can 2 x 5 L
